Profile

Detail-oriented Biomedical Sciences and bioinformatics graduate with over 4 years of professional experience in clinical research and laboratory analysis. Recently completed a Master of Science in Bioinformatics, I bring expertise in data collection, analysis, and reporting. Known for precision, adaptability, and a commitment to advancing equitable health research, I aim to contribute meaningfully to rigorous projects and evaluation initiatives.

Education

Master of Science in Bioinformatics 2022 – 2024

Brandeis University Graduate Professional Studies

- **Relevant Coursework:** Biological Analytical Analysis, Mathematical Modeling, Drug discovery and development, Biomedical Statistics, and machine learning

Bachelor of Science in Biomedical Sciences 2015 – 2020

University of Central Florida

- **Relevant Coursework:** Molecular Microbiology, Organic Chemistry, Pathology and Laboratory Medicine, Biomedical Research

Work Experience

Epic Products Analyst 10/2024 – present

Orlando Health Orlando, United States

- Designed, built, and tested Epic applications to support clinical and research workflows.
- Collaborated with analysts, end users, and cross-functional teams to gather and document business, functional, and technical requirements.
- Developed test plans, user guides, training materials, release notes, and technical documentation.

Clinical Research Coordinator 04/2023 – 10/2024

Nemours Children's Hospital Orlando, FL

- Led coordination of the Biobank and Molecular Analysis Program (BMAP), including workflows and SOP development for sample acquisition and patient consent.
- Supported comprehensive research processes, from protocol adherence to participant follow-up.

Research Laboratory Technician

Sarah Cannon Research Institute

12/2021 – 03/2023

Orlando, FL

- Obtained blood and other samples, vital signs, and EKGs from patients in phase one clinical trials.
- Processed and shipped PK/PD samples according to instructions provided by the sponsor.
- Attended SIVs to ensure understanding of sponsor-specific studies and SOPs while giving feedback regarding the lab's capacity to perform tasks needed.

Research Laboratory Technician

PPD, INC.

12/2020 – 12/2021

Orlando, FL

- Collected and harvested plasma, serum, and other laboratory specimens according to protocol specifications, including PBMC processing.
- Assisted Clinical trial coordinators with any issues that occur revolving around clinical research.

Skills

Data analysis – Data Analysis & Research: statistical analysis, and data visualization

Programming Languages – Python, R, Bash Scripting, SQL, Power BI, AWS
